

ACSP-AESOP 4th Joint Congress

Session Titles by Track

As of June 22

The numbering system given to identify sessions within each track does not describe the status of a session nor provide any schedule information. The numbers are purely for administrative identification and tracking purposes by the Congress schedule organizers. You will find when viewing the table of sessions, like a puzzle, as sessions were moved from room to room and time slot to another time slot during the scheduling process, the numbers lose much of their sequential ordering. You may even see some session numbers missing – these missing sessions likely collapsed from withdrawal of presenters.
