

UNIVERSITY OF ILLINOIS
AT CHICAGO

Department of Biopharmaceutical Sciences (MC 865)
College of Pharmacy
833 South Wood Street
Chicago, Illinois 60612-7231

**Postdoctoral Fellowship
University of Illinois Medical Center
in Chicago**

There is an opening for a postdoctoral fellow to study the role of epigenetics in pain and drug abuse. Previous experience in epigenetics or neuroscience is required. Other qualifications for this position include experience in molecular biology techniques (for example, cloning and mutagenesis methods), immunohistochemistry or imaging (e.g., Ca²⁺ imaging), or behavioral studies (e.g., pain or addiction models). This is a potentially multi-year position that will provide the opportunity for career development. Interested candidates should send CV including a list three references to:
